

disadvantages of ordinary elastic straps: loss of elasticity with time and excessive stretching in case of a fall.

Ergonomics

- The X-Pad back pads keep the harness shape, enabling the user to slip the harness into position easily.
- Automatic buckles enable quick and easy fastening.
- Sliders on the straps allow the user to adjust the harness easily and secure loose straps in position.
- The HT Electra belt turns inside the harness to allow for outstanding freedom of rotation.

HT Electra

Harness designed for working on power posts. The HT Electra belt rotates inside the harness to allow for freedom of rotation when working on electrical cables from the post.

Complies with Standard EN 358 and EN 361

- Soft, permeable X-Pad back pad providing structure and style
- 1 attachment point dorsal, sternal
- 2 attachment point lateral
- Automatic buckles
- Sliders for strap adjustment. Cannot be removed for security reasons
- Fall indicator on each attachment point
- High-comfort, mountaineering design leg straps (adjustable slider)

Option : Elastrac™ units for increased comfort and mobility
