

# Automatic FALL PREVENTION DEVICES

## EN 360

**VERDITRAC**  
by Tractel

**Blocfor™ 5 and 6 ESD**, automatic fall prevention blocks, are equipped with a new generation of energy dissipator installed at the end of the strap. This new dissipator ensure the user an impact of less than 600 daN even if they fall when the strap is completely unwound. This **ESD** system (**Extremity System Dissipator**) reduces the violence of the impact on the user's body in the event of a fall and protects the strap from the risk of cuts due to sharp angles on terrace roofs.

- Less bulky.
- Ergonomic, ensuring perfect handling.
- Anchor point that can take large diameter connectors.
- One end of the strap equipped with the **Tractel® ESD** system.

### Blocfor™ ESD

- Polyamide 5m or 6m lanyard, 25mm wide.
  - Container in polyamide holding the ABS
